Reverse Phase Extraction Kit

Brand: OFI Testing Equipment, Inc.

Product Code: 165-65

Availability: Call for availability

Lead Time: 30

Description

The Reverse Phase Extraction Test Kit is used for the determination of crude or formation oil, or other petroleum oil contamination, in non-aqueous fluids used in oil and gas exploration. The test method is intended to be used as a positive/negative test to determine the presence of crude oil in NAF prior to discharging drill cuttings from offshore drilling and production platforms. < v = 16.75 (53 × 34 × 43 cm) < v = 16.75 (15 × 34 × 43 cm)
